# GREEN GUIDE

- NATURE'S MAGIC PEST REPELLENT -

## COST SAVING TIPS FOR STAYING GREEN

Discover Eco-Friendly tips on natural pest control for your home or farm.

## HOW TO USE

Learn how to apply Blue Magic™ to your plants properly.

## TURF & LAWN CARE

Combat pests and white powdery mildew on sports fields, yards, parks and golf courses.

# STAYING GREEN & SAVING GREEN \$\$

Blue Magic™ was developed to manage sustainably and even reduce farming costs across the board and the hazardous ecological impacts that modern-day farming creates. In addition, researchers and farmers are finding that implementing Blue Magic's Microbiome Replication Technology™ enhances growth rates, reduces fertilizer inputs, increases vitality, and naturally deters a wide variety of pests. If that isn't enough, Blue Magic™ is a very effective Fungicide! All of these attributes have spared the wallets and simplified pest defense and maintenance for homeowners, property management companies and food crop farmers across the U.S.

In conjunction with its patented Microbiome Replication Technology™, Blue Magic™ has shown up to a 30% increase in Nutrient uptake rates of many species of plants and an increase in vitality by nearly the amount. These results coupled with warding off common pests such as Mosquitos, Spider Mites, Chiggers and even those pesky No-See-Ums! In addition, with the potential to help farmers use less fertilizer and produce higher-yielding crops, Blue Magic™ has the capabilities to reduce phosphate runoff, a rising concern for farmers and ecologists across the globe. Using Blue Magic™ products can help you stay ecologically sustainable while saving you some major green!

# PEST MITIGATION AND PREVENTION

*Blue Magic™ was created to be a pest preventive, not a harmful pesticide. The naturally derived complex of sesquiterpenes behind the science of Blue Magic™ is found in nature in many pheromonal excretions from non-predatory insects around the world. Certain plants also contain one or more of these compounds to help repel pests and prevent white powdery mildew.*

*"Blue Magic is currently being studied in various food crops by Multiple Universities, State parks and recreational areas, Turf Grass Breeders, and Farmers to mitigate irritating pests and reduce the chemicals generally used to keep these areas bug free and beautiful!" - Ryan Early - Inventor*

## EFFECTIVE ON MANY COMMON PESTS:

- Mosquitos
- Gnats
- Fleas
- Chiggers
- White Flies
- Spider Mites
- Russet Mites
- Bot Flies
- House Flies
- NoSeeUms
- Aphids
- Thrips
- Squash Bugs
- Silverfish
- Ants
- Chinch bugs
- Fungus gnats
- White Powdery Mildew

## HOW TO USE:

### Step 1

Make sure to shake bottles thoroughly before applying treatment. Turn off any grow lights if used before spraying to avoid damaging plants.

### Step 2

Apply Treatment. Be sure to cover all leaves, stems, and stalks. If applying to trees, shrubs or grasses, make sure to evenly cover the entire plant.

### Step 3

For best results apply treatment weekly for preventive measures. For infestations, you may apply application every 2 days until pests are gone. Then return to normal weekly treatments.

## Fields & Golf Courses

Players and spectators can worry less with Blue Magic™, lessen your chances for harmful insects while creating brighter, lush green fields and courses with the powerful, All-Natural pest repelling ingredients of Blue Magic™.

---

## Sod & Lawns

Whether you want to set a healthy foundation for sod application or create a greener and safer yard with less worry about mosquitos and other pests. Let Blue Magic™ save you some money on lawn fertilizer costs while being the safe alternative to harsh pesticides.

---

## Parks & Playgrounds

Use Blue Magic™ to help create a safe and sustainable environment for children to run and play without the stress of harmful insects lurking around. Safe for use around pets and people! And BEE FRIENDLY!

# TURF & LAWN CARE

Blue Magic™ has shown to be highly effective on commercial turf fields and residential lawn care applications to combat common fungus and mildew issues associated with turf management. Blue Magic™ has been shown to reduce fertilizer requirements by up to 30% in Turf production. This allows for significant savings on fertilizer needs and lower water requirements alongside increasing heat resistance!

During a recent study, Blue Magic™ was proven to eradicate white powdery mildew in commercial sod farms and golf course management. When used regularly, our pet and child-safe product help to reduce the number of pests found around parks, playgrounds, fields and even backyards. Effective at deterring mosquitos, chiggers, ants and more!

Turf grass and Lawn Care recommended mix rate is 1 oz Farm & Ranch per gallon of water and applied at 7.8 gallons per acre of mixed product.

# FAMILY FRIENDLY PRODUCTS

Blue Magic™ products provide powerful and natural solutions to eliminate Fungus and repel harmful insects without the use of synthetic chemicals. Blue Magic™ products are safe for use around child & pet friendly areas of the home and garden. Using our innovative and sustainable Patent Pending Microbiome Replication Technology™, our products replicate natural pheromonal excretions produced by insects to warn other insects of immediate danger. We were able to duplicate this effect using this patent pending plant based technology to eliminate the need for harsh chemicals for not only home and garden protection but pest that affect people and pets too.
